\*Good through September 3, 2013 with this postcard. Offers cannot be used for previous purchases or in conjunction with other sales or offerings. See store for further information concerning rebates.

Remote and Timer

Now I can tuck myself in and watch as my Hunter Douglas motorized window fashions from One Stop Decorating do their own little dance, from ceiling to floor. Tomorrow night, don't go from room to room, manually closing every shade in your home. A Hunter Douglas® remote, wireless wall switch, or computer tablet can do it all for you... with just a tap, or flick or click of the fingers. And you can **program your motorized shades to open, close or move up and down at your every whim or simply to fit your lifestyle.**
